

QUANTUM® 610

Introducing:)

The Quantum 610 Paediatric is based on the standard Q610, which has proved to be a very reliable wheelchair to many thousands of clients the world over. The Mid Wheel 6 chassis design moves with simplicity and ease giving the user the confidence to explore their environment. Our unique Omni Castors fitted to the front & rear of the wheelchair are designed to keep Mum & Dad's home damage free, by removing sharp points from the castor housings. Glide Motors and Enhanced Active-Trac Suspension are just some of the standard features, which can be found on the Quantum 610 Paediatric.

The Q610-P also comes fitted with our Synergy Seating System as standard, designed to grow with your child and available with an expanded range of power options, the Q610-P ticks all the right boxes.
